

Powerway ISO/TS16949 Transition Program -- New Customers

The ISO/TS16949 Transition Program helps you attain registration from QS-9000 to this standard quickly, easily and painlessly!

Powerway Transition Program includes:

- Transition Assessment.
- Top Management Overview.
- Powerway Desktop, Document Manager, Authoring Tools, Audit Manager, and Corrective Action and Assessor w/ ISO/TS16949 template pack.
- Customized onsite training on document control software.
- Training at Powerway on Audit Manager and Corrective Action software.
- Document audit and registration of current quality system documents into new software.
- Two-day consulting session on implementing continual improvement.

Powerway quality management consulting programs provide fast, successful achievement of compliance to business standards to meet the demands of your customers and marketplace. Our latest offering, the ISO/TS16949 transition package, is designed for the company currently registered to QS-9000 who wants to transition to the updated standards and convert existing documents and programs to meet the new requirements in the updated standards. We take care of the details, install the necessary software, train your people on both the changes in the standards and the latest versions of Powerway software, and see you through the registration audit.

With our unique ISO/TS16949 template pack and knowledgeable consultants, we can help your company take the next step in quality.

The Powerway ISO/TS16949 transition program includes the services listed below.

Conversion Assessment

A Powerway Quality System Analyst (QSA) will compare your current system with the new requirements of the ISO/TS16949 standard. You will receive a detailed report, including a graph showing your current level of compliance and a list of action items that must be completed to comply with the new standard.

Document Audit

Your existing documents will be reviewed to determine compliance with the new requirements.

Top Management Overview

A Powerway consultant will conduct an overview of the ISO/TS16949 standard with selected members of management. This overview will emphasize the increased focus on upper management and customer satisfaction metrics in the new standard. The review also includes an orientation to continual improvement with regard to your existing processes.

Registration of Existing Quality Documents

As part of the transition program, we help you register existing quality system documents, including your Policy Manual and Procedures into your new document management software (legacy documents and records can be batch registered for an additional fee).

Creation of Any New Required Documents

We will also help you create any additional documents required by the revised standard.

Powerway Software

You will receive a Personal Edition of Powerway Desktop, Document Manager, Authoring Tools, Audit Manager, Corrective Action, Assessor w/ the ISO 16949 template pack and a one year Preferred Software Maintenance Agreement.

On-site Training of Installed Powerway Software

We will teach key employees in how to use the Powerway software listed above.

Two-day Consulting Session on Implementing Continuous Improvement

A Powerway QSA will conduct a two-day session on implementing continuous improvement strategies using one of your existing processes. This session alone will give your company a measurable return on investment.
